

Internet Terms of Service

Brandenburg Telephone Company (BBTEL) provides Internet access (the "Service") subject to your agreement and compliance with the terms and conditions below (the "Agreement").

The following policies apply to mass market broadband Internet services offered by BBTEL. BBTEL offers enterprise level services that can be obtained by contacting offices at <http://www.bbtel.com> or www.brandenburgtelecom.com. It is BBTEL's policy to provide robust and reliable access to the Internet for all its residential and commercial subscribers. Because network resources are shared by all users, BBTEL has implemented the following policies to govern mass market Internet service. These policies are designed to: (i) ensure that shared network resources are allocated fairly among all users; (ii) allow users and prospective users to understand service policies and any significant limitations on the service; and (iii) provide a foundation that assures customers that they can rely on consistently receiving the level and quality of service to which they subscribe. BBTEL does not block access to, nor discriminate against, any lawful website or Internet application and, with respect to fixed Internet access services, supports the ability of users to select and attach the equipment of their choice to the network so long as that equipment: (i) is used for a lawful purpose consistent with BBTEL's Acceptable Use Policy (Internet Terms of Service); and (ii) does not harm the network or degrade network performance for other users. Customers are encouraged to familiarize themselves with the following policies which are deemed part of their Service Agreement. By using BBTEL's Internet service, the customer agrees to be responsible for compliance with these policies by third parties, such as friends, family members or guests that make use of the customer's service accounts or equipment to access the network for any purpose, with or without the permission of the customer.

VIII. System Performance

BBTEL provides residential and commercial customers with a choice of data plans to meet their needs. While BBTEL provisions its network and equipment to ensure that its customers can enjoy the speeds to which they subscribe, Internet speeds generally result from a "best effort" service and are dependent on a number of variables, many of which are outside the control of an Internet Service Provider. Such variables include: the age and processing capability of the user's terminal device or computer; the number of applications running simultaneously; the presence of viruses or malware; whether the terminal equipment is connected to the network by wire or by

wireless; the distance the data packets must travel between the user and the website; the presence of congestion on and technical configuration of any intervening networks; any gating or congestion management schemes employed by websites to limit download or upload speeds in cases where multiple users are served simultaneously. BBTEL does not guarantee that a customer will achieve the speeds set forth above at all times. Rather, the foregoing data speeds represent the best information available to BBTEL.

Typical Speeds

Service Download Upload Latency (ms)

512K 512K 512K 45

2M/1M 2MEG 1MEG 40

2MEG 2MEG 2MEG 30

Speed tests that allow customers to test the upload, download and latency performance of their broadband data services are available free of charge from a number of sources. Generally, these tests are influenced by the same variables that affect Internet speed set forth above. Accordingly, the speed results would not be expected to match a test of BBTEL's network conducted under laboratory conditions. Please note, however, that all speed tests use different methodologies to calculate Internet connection speed so each of these tests would be expected to yield different results. Accordingly, each of these tests should be viewed as a helpful guide rather than as a definitive measurement of performance. The following are several sites, unaffiliated with BBTEL, that provide speed testing:

<http://netalyzr.icsi.berkeley.edu>

<http://www.broadband.gov/qualitytest/about/>

IX. Network Management

BBTEL utilizes a fully redundant network architecture that is designed to provide users with true broadband speeds and reliability even during times of peak demand. The network has been constructed to meet projected traffic demands and is fully scalable to allow for capacity to be added to meet customer needs and to support newly developing and increasingly sophisticated applications well into the future. However, congestion can occur on any IP network, and, when it does, packets can be delayed or dropped leading to service degradation and delays. Because network resources are shared by all end users, BBTEL has implemented a traffic management policy that is designed to ensure that all users are able to utilize their fair share of network resources during periods of high demand.

BBTEL employs a protocol agnostic congestion management policy that does not discriminate against particular applications. Users remain free to access the websites of their choice and run the applications of their choice consistent with Terms of Service Agreement. BBTEL deploys quality of service and network management servers and software that constantly monitor aggregate network traffic levels. BBTEL does not block ports or protocols.

X. Device Attachment Policy

BBTEL provides fixed broadband data services, users may generally attach the devices of their choice and run the applications of their choice, subject to their data package and the terms of their service agreement. While many devices such as routers, Bluetooth and WiFi cards, laptops, notebooks and tablets are readily available from third party sources, such as consumer electronics retailers, other devices, such as DSL modems and proprietary network gateways must be provided by or leases from BBTEL. BBTEL is not responsible for the compatibility, suitability or functionality of any equipment that is provided by the customer or any third party, and the customer remains fully responsible for ensuring that any such equipment does not cause any harm to the network or degrade the service of other users.

All Users are fully responsible for securing their equipment, including wireless routers, to prevent unauthorized access to the network by third parties and will be held fully responsible for the actions of such third parties that gain unauthorized access to the network through unsecured end user equipment.

X. Commercial Terms

Your service order indicates whether you have agreed to a minimum service term for your service and, if so the number of months in the term. Any cost for early termination is outlined in your contract for service. YOU MAY BE SUBJECT TO ADDITIONAL FEES IF YOU CANCEL SERVICES BEFORE THE END OF THE MINIMUM SERVICE TERM (OR IF WE TERMINATE YOUR SERVICE EARLY FOR CAUSE UNDER THE AGREEMENT)
